

OFFSHORE SUBSEA INTERVENTION

Beacon Offshore Ltd. is a Thailand based provider of subsea services to the Oil & Gas industry in S.E. Asia. Our 30 years of local operating experience translates into offshore IRM projects that are consistently delivered safely, on time and within budget.

We own and operate Diving & ROV Support Vessels as well as a range of modular and containerized diving and ROV systems - all built and certified to IMCA standards. Through strategic partners we also offer fully integrated survey, positioning and engineering services for a total subsea service package.

Beacon Offshore Ltd. is an ISO 9001:2008 certified Classification approved IMCA Contractor applying a Safety Management System founded on management commitment, supervisor accountability and personal responsibility. We facilitate a documented process based on safe and correct behavior, appropriate training, fairness and IMCA code of practice.

Our aim is to provide safe, consistent, flexible and cost-effective services to offshore Oil & Gas clients in Thailand and throughout the region.
