

Beacon Offshore Ltd. (BOL) strives to provide quality to its valued customers in all areas and is committed to delivering services that exceed stakeholder expectations. BOL understands that to achieve this it needs an exceptional team who are supported by robust and well-resourced Quality Management Processes.

To implement this policy and maintain its commitment to quality, BOL undertake the following:

- Continuous improvement of the Quality Management System through measuring & benchmarking its performance
- Seeking, analysing and sharing regular Client feedback and any complaints
- Manage Suppliers selection and performance monitoring against set criteria
- Train and develop its most important assets, employees
- Regular review and auditing of processes, internally and externally
- Set clear Key Performance Indicators (KPI) for quality objectives, that are measurable and which reflect the BOL philosophy
- Conduct senior management reviews of its Integrated Management System (IMS) focusing on quality
- Maintain an IMS with the standard: ISO 9001 – Quality, at it's core
- Set and monitor measurable objectives and targets
- Provide the resources needed to realise quality outcomes
- Operate in compliance with all applicable requirements including legal and national
- Proactively maintain and upgrade equipment
- Work to identify and eliminate non-essential and non-conforming practices
- Define quality roles and responsibilities for its stakeholders
- Align service delivery with best practice and audit outcomes
- Effectively communicate this policy and supporting processes to all stakeholders

BOL supports all personnel both individually and as a team, to achieve with 'Quality,' outcomes.

BOL recognises and appreciates the commitment to quality from its employees within their own areas of work as we go forward together to ensure that Quality is embedded within the whole of the company.

BOL Vision

To become recognised as a superior provider of marine and subsea intervention services in Thailand and S.E. Asia.
