

## ASSET BASE

## SUBSEA INTERVENTION

Beacon Offshore Ltd. is a Thailand based provider of subsea services to the Offshore Oil, Gas and Wind Farm industries. Our 30 years of local operating experience translates into offshore projects that are consistently delivered safely, on time and within budget.

We own and operate integrated ROV & Diving Support Vessels as well as a comprehensive range of modular and containerized ROV & Diving systems – all built and certified to IMCA guidelines. Through strategic partners we also offer fully integrated survey, positioning and engineering services for a total subsea service package supporting IRM, Light Construction and Decommissioning Works.

## QHSE

Beacon Offshore Ltd is an ISO 9001, 14001 & 45001 certified and Classification approved IMCA Contractor applying a Safety Management System founded on management commitment, supervisor accountability and personal responsibility.

## FULL RANGE OF SUBSEA SERVICES

Beacon Offshore Ltd. has a proven international track record. Our subsea operations are executed by a dedicated professional work force, sophisticated assets, and a quality process built on years of offshore experience. These processes are being constantly developed based on a lessons learned philosophy.

IRM Works on offshore structure - Beacon Altair

## INSPECTION, REPAIR & MAINTENANCE

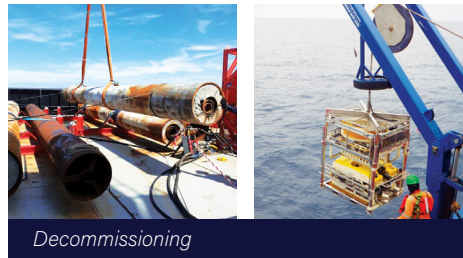

Our subsea IRM teams carry out numerous projects on pipelines and subsea structures every year. Operating our comprehensive range of robotics from light observation class ROVs to heavy duty WROV systems, supported by Diver Intervention where applicable, we provide full turn-key solutions for operators of offshore assets to maintain IACS accreditation and peace of mind.

## LIGHT CONSTRUCTION:

Light construction support from own or chartered vessels using robotics or diver intervention techniques. Flexible modular WROV and DIVE systems can be mobilized onto client vessels or offshore structures to provide operations independent from 3rd party vessels and to minimize weather disruption.

Decommissioning

## DECOMMISSIONING:

Since 2020 Beacon Offshore Ltd has been heavily involved in decommissioning activities throughout Thailand. Services range from wire line data logging of wells, right through to the internal cutting and retrieval of 87 well heads completed in 2022 for Chevron. Other activities included pipeline cutting and relocation, mass flow excavation & pipeline plugging.

Modern and well equipped support facilities at HQ near Sattahip Port

## Sattahip Head Quarters comprising:

- 800 m2 offices and public areas
- 4,500 m2 warehouse and workshop

## Strategically well Located:

- 15 km from Sattahip Port
- 50 km from Laem Chabang Deep Sea Port
- 140 km from Suvarnabhumi International Airport
- 7 km from Utapao International Airport
